

THE SOLUTION IS THE SOLUTION

Patented Formula

AquaMax 1+3 is a cleaner/detergent for ALL water-based/waterborne coatings. It is a blend of water soluble solvents and additives designed for automatic spray gun cleaning, but can be used for quick, effective manual cleaning. It quickly dissolves dried waterborne/waterbase coatings and both cleans and protects spray equipment.

AquaMax 1+3 is in a concentrated form and **MUST** be mixed with tap water. The mixing ratio is one part (one gallon) concentrate to three or four (3-4) parts (three to four gallons) tap water. The product will not perform correctly if not mixed according to directions.

AquaMax 1+3, when mixed properly, is very Ph stable and will produce no foam. It safely dissolves waterborne coatings, varnish, grease and dirt from all metal and plastic parts. This includes waterborne coatings that are dry.

CLEANS 100% IN 1 STEP

H2O-1 AquaMax 1+3

SCA-H2O-1 Meets SCAQMD VOC requirements when mixed.

2 gallon per case

Reductions for Automatic Cleaning:

1 + 3 = 25% active cleaning ingredients

1 + 4 = 20% active cleaning ingredients

Ph Levels: AquaMax 1+3, when mixed with tap water (7.0 – 7.2 Ph) is very Ph stable at 8.0 – 8.5 Ph. As you use or dirty the cleaning solution, the Ph level will rise. Coagulate frequently or replace – never use if Ph is above 10.5. When using B-TEC Systems gun washers, coagulate or dispose after 60 – 80 wash cycles

Spray Gun Maintenance:

Never soak spray guns in water or cleaning solution.

Always clean spray guns with air cap on.

Always blow dry and hand dry equipment after washing.

At end of day, remove needle, wipe clean, lubricate and install.

BE BETTER. BE SMART. B-TEC
